

# An Innovative, At-Home, Smart Light Therapy Solution to Treat and Manage Chronic Skin Conditions

The Zerigo Health solution provides a smarter way to deliver clinical-grade NB-UVB phototherapy for patients with chronic skin conditions like eczema and psoriasis. For most patients, it may be available at no cost<sup>1</sup> through their employer or sponsoring health plan.

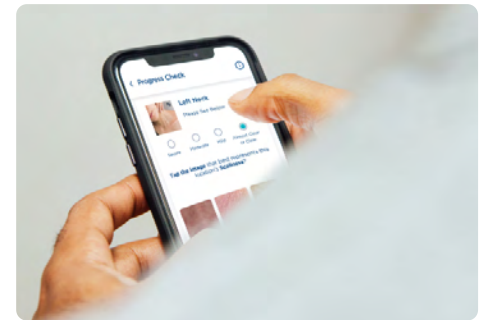

## The Zerigo All-in-One Solution features

An FDA-Cleared<sup>2</sup>, handheld, NB-UVB Smart Light Therapy Device: Delivers precision phototherapy according to your prescription for targeted treatment.

## One-to-One Support

ZerigoCare™ Guides provide personal support to patients through live educational video onboarding. Patients are coached through first-time treatments, using the Zerigo app, and then are remotely monitored to track ongoing progress, adherence, and outcomes. Our care team consists of phototherapy experts in addition to RNs, MAs, and CHWCs.

## Zerigo App

Our smart app manages NB-UVB dosing, treatment frequency, and duration in adherence to your prescription. In addition, it automatically calculates and delivers treatment doses, provides treatment reminders, tracks results, and connects patients to our expert ZerigoCare™ team.

# You Prescribe. We Deliver.

As a prescribing health care professional, you will always maintain clinical oversight and manage patient prescriptions and treatment to ensure continuity of care. After all, no one knows your patients like you and your care team.

Our platform generates monthly patient progress reports, which include patient progress photos and adherence data to keep you updated on their therapy progression and outcomes. Since its HIPAA compliant, patient privacy is protected.

# Smart Light Therapy. The Easy Way.

## Zerigo Health:

- Coordinates all eligibility verifications, and prior authorizations, in advance with the member's sponsoring health plan, eliminating the need for time-consuming administrative requirements for you and your staff.
- Monitors patient progress and adherence daily.
- Manages administrative and billing services for covered patients.
- Reduces the burden for back-office staff through our phototherapy coordinators.
- Generates monthly patient progress reports to enable clinical oversight.
- Facilitates Rx renewals.

## Zerigo Delivers Positive Clinical Outcomes and an Exceptional Patient Experience

- Patients demonstrated results comparable to in-office phototherapy.<sup>3</sup>
- More than 95% of patients say Zerigo Smart Light Therapy is easy to use.<sup>4</sup>
- 90% of patients reported being satisfied or more than satisfied.<sup>4</sup>
- 81% of patients rated their experience as good or great.<sup>4</sup>

(1) The Zerigo Health Solution may be provided as a value-added benefit by your pharmacy or employer health plan. A copay or co-insurance may be required when you see a physician to request a prescription for phototherapy treatment. (2) The Zerigo Solution received FDA clearance on May 23, 2017. The Zerigo Health Phototherapy System is an Ultraviolet Light Emitting Medical Device. It is intended for use in localized phototherapeutic treatment of dermatologic conditions such as psoriasis, vitiligo, atopic dermatitis (eczema), seborrheic dermatitis, and leukoderma on all skin types (I-IV). The Zerigo Health Solution is not intended to provide medical advice or be a substitution for appropriate or necessary health care treatment. (3) Yule S, Sanyal S, Ibbotson S, et al. Self-administration of hospital-based narrowband ultraviolet B (TL-01) phototherapy: A feasibility study in an outpatient setting. *Br J Dermatol* 2013; 169:464-8.
